

Cup Noodles Vending Machine Introduction

Product parameter

Operation mode: 22 high-sensitivity capacitive touch high-definition screen

Whole machine combination: main cabinet

Cargo lane design: 6 floors and 54 cargo lanes

Saleable goods: cans, bottled water, bagged food, large bowls of instant noodles, etc.

Refrigeration system: refrigeration

Power consumption of the whole machine: 0.05-0.65KW/H

Net weight of the whole machine: 360KG

Payment method: online payment

Containment method: drawer spring cargo lane

Commodity capacity: 350-1300

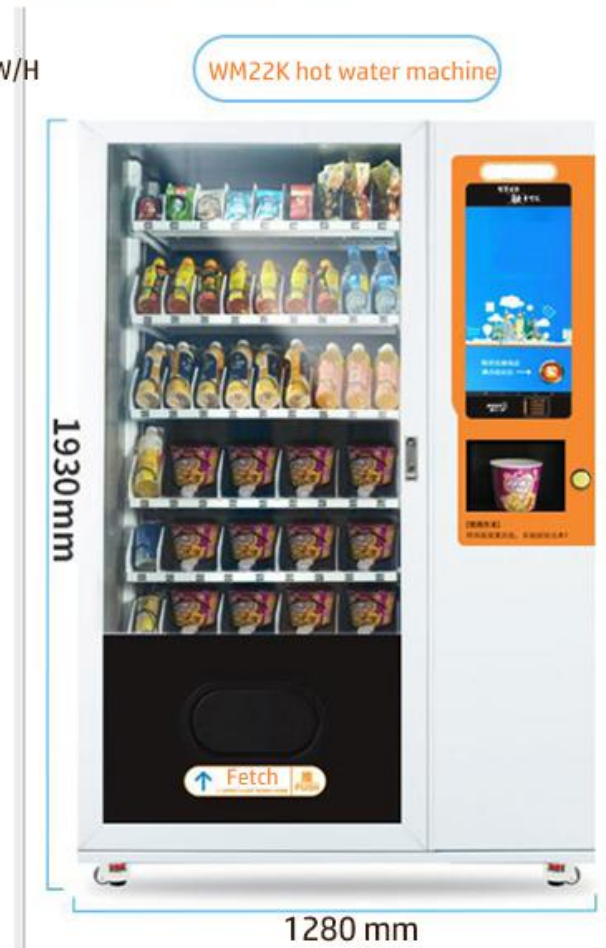

Dimensions: width 1280mm 830mm high1930m

Glass door cabinet: high-strength tempered glass

Working voltage: alternating current (AC) 220V 50HZ

Processor: High-performance Android computer

Hot water supply

Noted:

Customizable appearance

Customized cargo lane

Features:

low investment, quick payback, payback period less than half a month

Specification of hot water supply cup noodle vending machine:

Item	cup noodle vending machine with hot water supply	Commodity capacity	350-1300pcs
Dimensions	width 1280mm 830mm high1930m	Voltage	alternating current(AC)220V 50hz
Payment method	coin and bill acceptor & online payment	Containment method	drawer spring cargo lane
Glass door cabinet	high-strength tempered glass	Refrigeration system	refrigeration
Cargo lane design	6 floors and 54 cargo lanes	Power consumption	0.05-065KW/H
Operation mode: 22 high-sensitivity capacitive touch high-definition screen			
Saleable goods: cans, bottled water, bagged food, large bowls of instant noodles			
Processor: High-performance Android computer			

Drink instant noodles

Support online pay

Multi-buy function

Support shopping cart function

Remote meter/remote control: cooling, defogging, LDE light, horn, etc.

AI energy management

Mobile phone/computer remote management

Electric meter, tempera-
ture, defogging glass

Screen, speaker, LED light

序号	时间	耗电量kw/h
1	2019/10/7	1.2
2	2019/10/6	1.0

Remote meter

You can view the electricity consumption in real time, eliminating the cost of installing electricity meters on site and confirming electricity consumption with local sites every month

Temperature setting

Support remote setting of temperature in different time periods and real-time monitoring of machine temperature.

More energy-efficient and more secure.

序号	开始时间	结束时间	温度	报警
1	08:00	18:00	8	报警
2	18:00	18:00	7	报警

LED lights, defogging glass,
screen, speaker settings

Turn on the LED lights/adjust the defogging intensity of the heating glass according to different time periods/turn off the screen and control the sound, which is more energy-efficient and smarter.

自动开始时间:	03:00
自动结束时间:	17:00
状态设置:	开关

Details make a difference

Craftsmanship

Shelf

Pull out more, there are
4 bottles in front
Easily fill the last bottle directly

Fetch

The use of modified PP material for automobiles has a light hand feel (no injury to hands), high precision, strong sealing (heat preservation), no rust

Press the anti-theft lock

Safe, luxurious
and relaxing

Henggu universal runner

More reliable
and convenient

Embraco compressor
Famous foreign brands
Energy saving
and reliable

One-piece freezer
Overall heat preservation,
more energy saving

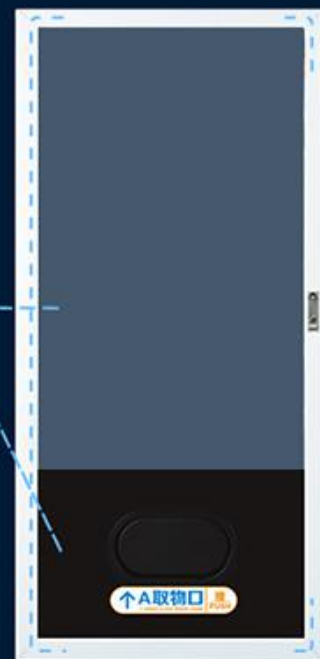

Can really use the shopping cart function

Large-capacity cargo hopper, up to 5 products at a time, no cargo jam

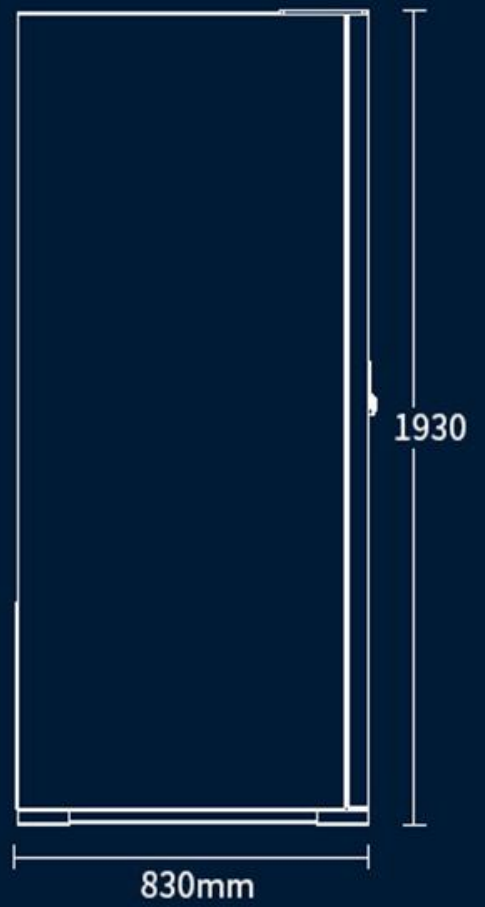

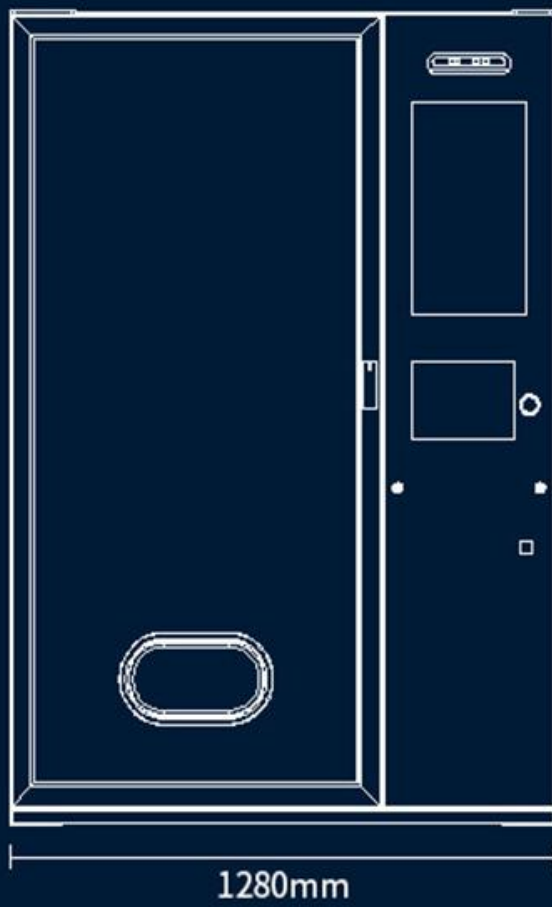

Double full glass door

(Aluminum door frame)

Insulation, luxury, high precision

Equipment size

Customer example

Compact body. Only one square meter to open a shop

Flexible space, use fragmented time to replenish
open 24 hours
